REGAL STONE SEALER

REGAL Stone Sealer is a high performance, natural look impregnator sealer for all natural stone. Formulated with the latest solvent-based fluoropolymer technology to protect against all oil & water-based stains.

PRODUCT BENEFITS:

- Latest solvent-based fluoropolymer technology
- High performing, natural look sealer that protects against all stains
- Allows proper air transmission through the stone
- Odorless
- FDA compliant solvent
- Interior and exterior use

Directions:

Always test in inconspicuous area, allowing for a full 24 hour cure time to determine the desired result. Allow new grout installations to cure as directed (at least 24 hours). Make sure surface is clean, dry and clear of waxes and coatings.

- 1) Mask off any areas not intended to be treated.
- 2) Remove any dirt and debris.
- 3) Make sure all topical or wax finishes have been removed and is clean and residue free.
- 4) Revolution Stone Products REGAL Stone Sealer can be applied one hour after standing water has been removed.
- 5) Apply a liberal, even coat of sealer over the entire surface using a low pressure pump sprayer, roller, or paint brush.
- 6) Allow sealer to penetrate the stone for 15 to 30 minutes. Spread any excess over the surface to ensure proper penetration. Wipe off any remaining sealer before drying the surface.
- 7) A second coat may be required for more porous surfaces. The second coat of sealer may be applied 30 minutes after initial application as directed in steps 1 – 5.
- 8) 30 minutes after final application, wipe entire surface down with towel moistened with sealer to remove residue if needed.
- 9) Wait at least 24-72 hours for sealer to cure. Foot traffic may begin in 5-7 hours. Cover if foot traffic is to resume before recommended time frame.

Coverage and Expected Wear:

Depending on type of stone and method of application

Coverage: 200 – 1500 sq. ft. per gallon

with proper care
